Education

M.S. in Finance & Business Analytics | *Hult International Business School — Boston, MA* **Expected April 2026**
Applied Quantitative Finance & Machine Learning | *Harvard Business School — Cambridge, MA* **Summer 2025**
B.A. in Business Management | *Rollins College — Winter Park, FL* **Graduated 2022**

Certifications

CFA: Level I (candidate) | **FINRA & NASAA:** [SIE](#), [Series 66](#) | **CFI:** [FMVA \(Financial Modeling & Valuation Analyst\)](#)
Microsoft: [Fabric Data Engineer \(DP-700\)](#), [Fabric Analytics Engineer \(DP-600\)](#), [Power BI Data Analyst \(PL-300\)](#)

Experience

Analytics Engineer — Finance | *Multiple Clients (TMT, Construction, Real Estate) — Remote* **Jan 2024 — Present**

- Designed and deployed cloud-based data lakehouses, ETL pipelines, and interactive dashboards using Azure, Fabric, Power BI, Python, SQL, and GitHub; enhanced reporting quality and reduced manual processes across 3+ SME clients
- Collaborated cross-functionally with Finance and Technology teams; developed queries to extract insights from large-scale datasets (10M+ records), translating analytical results to both technical and non-technical stakeholders
- Identified \$150K+ in process improvement opportunities through applying data exploration and machine learning techniques (regression, clustering, time series analysis) to support customer segmentation and operational forecasting
- Optimized Apache Spark compute resources and pipeline execution by refactoring codebase from Pandas to DuckDB and Polars dataframe libraries, reducing cloud spending by 5% of budget, while improving code reliability and performance
- Authored SOPs and training documentation using Microsoft Office (Word, PowerPoint); provided hands-on training on data governance best practices and tool usage to internal teams

Technical Staff Accountant II | *Store Space Self Storage (Real Estate) — Orlando, FL* **Dec 2022 — Oct 2023**

- Produced monthly financial statements (P&L, balance sheet) for 50+ business units totaling \$150M+ in revenue; resolved data discrepancies using SQL scripts and built Power BI dashboards to support stakeholder analysis and decision-making
- Automated journal entry workflows using VBA macros, SQL, and Excel (Power Query, advanced lookups) integrated with ERP systems; eliminated 60% of manual processes and accelerated month-end close from 10 to 7 days
- Collaborated with Controller and CFO during annual budgeting to build Excel financial models for multi-unit forecasting; delivered project one month ahead of schedule by streamlining data collection and validation processes

Projects

Portfolio Construction & Optimization | [Quarto Dashboard](#) | [Excel Model](#) | [IPS Report](#) [🔗 Source Code](#)

- Engineered portfolio optimization framework using Markowitz Mean-Variance Optimization in Python (NumPy, SciPy) and Excel Solver; executed Monte Carlo simulations across 10,000+ scenarios to determine optimal asset allocation strategies on the efficient frontier line for diversified portfolios of S&P 500 equities and fixed-income ETFs
- Evaluated portfolio risk and return characteristics using Sharpe and Sortino ratios, Value-at-Risk (VaR), and CAPM for equity positions; applied duration and convexity to assess fixed-income interest rate sensitivity for optimal bond allocation
- Designed an interactive performance dashboard using Quarto (Python) and JavaScript to visualize portfolio holdings, performance attribution, and benchmark comparisons against market indices; delivered a comprehensive Investment Policy Statement (IPS) documenting investment strategy, risk tolerance, and rebalancing procedures

Portfolio Performance Analytics | [Tableau Dashboard](#) | [JavaScript Report](#) [🔗 Source Code](#)

- Analyzed client portfolio returns using SQL for data analysis and Tableau for interactive visualization; supplied responsive SQL script execution in a JavaScript report for in-browser ad-hoc analysis using DuckDB WASM (WebAssembly) API

Equity Research & Valuation — Garmin Ltd. (NYSE: GRMN) | [Excel Model](#) | [Report](#)

- Developed 3-statement financial model in Excel with scenario analysis and sensitivity tables; performed DCF and comparable company valuation analysis supporting SELL recommendation with 25% downside to \$140 price target

Technical Skills

- Languages:** Portuguese (native), English (fluent), Spanish (conversational)
- Programming:** SQL, Python (pandas, polars, numpy, scipy, scikit-learn), R (tidyverse, dplyr, ggplot), JavaScript
- BI & Reporting:** Power BI, SSRS, Tableau, Advanced Excel (PowerQuery, VBA, Arrays, Lookups), Word, PowerPoint
- Cloud & Data Platforms:** Microsoft Azure, Fabric, AWS, Snowflake, BigQuery, Databricks, Apache Spark, GitHub
- Financial Tools:** Bloomberg Terminal, FactSet, Capital IQ, PitchBook
